

Wildcamping Map & POI User Guide – France & Iberia

These are provided as just two files, one for France and one for Iberia, comprising free and chargeable aires, and a rapidly growing number of urban and rural wilding spots too!

For France and Iberia you will also find a number of tap locations listed. These have the prefix WS (water standpipe).

Please note the information provided in this document is additional to the User Guide for England, Wales and Scotland, and should be read after you have read that document.

IMPORTANT: Note that this is a **REPLACEMENT** for all the information you may have already downloaded. **Remember that some locations have been DELETED.**

NEW! Locations known to have access restrictions will have their names prefixed with RA

It is highly advisable with such locations to check them out with the Wild Camping Location app before travelling. The description will tell you what the restriction comprises – it may advise use by smaller vehicles and/or it may advise to approach from a specific direction.

Contents

Included are files named France and Iberia using the same folder structure as that used for England, Wales & Scotland.

The files provided are for use with Tom Tom and Garmin satnav devices, as well as Google Earth, each in an appropriately named folder. Further details about the use of these files is contained within the User Guide - England, Wales & Scotland.

In the France and Iberia POI files, each entry is categorised by prefixing the location description as follows:

CR – car park rural

CU – car park urban

OU – other urban

OR – other rural

LR – layby rural

LU – layby urban

AC – aire chargeable

AF – aire free

Comments have been added where useful. These are only accessible in the Wild Camping apps, Google Earth or AutoRoute.

For example, the comments contain information about:

- Costs for aires that charge
- Access restrictions
- A TinyURL or Google link to the Streetview image where available

All the GPS positions have been confirmed using Google Maps.

Advanced Help & Troubleshooting

There's a wealth of information and tips, much more comprehensive than that given above, in the POI File Help and Support Forum which can be found here
